A complete standalone or dual-boot desktop for netbooks and Windows PCs

With Presto you can turn on your computer and be productive in seconds—without starting Windows. Securely surf the web, send email, chat, Skype, listen to music, watch movies, edit Microsoft Office documents, access Windows files and folders and do much more. When you're done, Presto shuts down instantly.

Xandros Presto for OEMs is a fully customizable and brandable instant-on desktop with integrated application store and marketplace. Its small footprint, snappy performance and low cost make it a perfect turnkey software solution for netbooks and other low powered devices. The application store and marketplace enables you to easily and quickly create revenue streams from devices like netbooks.

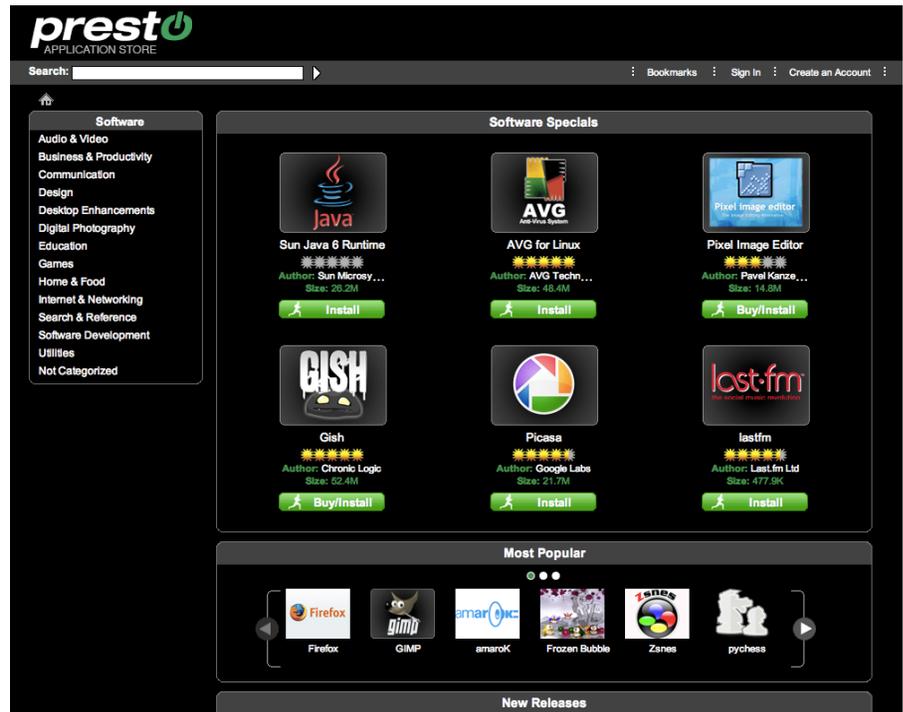

Integrated application store and marketplace

Drive device commerce through Presto's integrated application store and marketplace. Users can easily update and enhance their Presto experience by choosing from thousands of free and commercial applications and other content. Built on CNR.com, our own powerful platform for driving device commerce, the Presto application store can be branded and customized to provide direct links to your products and services. CNR.com also makes it easy for ISVs and other content providers to publish content to the Presto marketplace.

3G/4G wireless activation makes it easy to get online

Through our partnership with Synchronoss we're the first to enable netbook users to quickly and easily activate a 3G/4G data plan right out of the box. Plan options, activation steps and branding details can all be customized and preconfigured with Presto at the factory. Combined with Xandros ActiveSync-enabled PIM, you can offer push-email and calendaring to the desktop.

Customization options

Available customizations include:

- Software installation method
- Choice of bundled applications
- Desktop wallpaper to reflect your brand
- Localization
- Branded application store
- Reduced boot time for specific hardware configurations, such as netbooks
- Support for 3G/4G wireless with automated activation wizard
- Amount of free disk space required for installation
- Codec licensing for media playback

Easy to install and run

Presto is available with different installers depending on how you plan to deploy it:

- **Windows Installer.** Presto is packaged as an executable (.exe) that works with most Windows 7/Vista/XP laptop and desktop computers. It installs with a wizard like other Windows software and does not require a separate partition. Users can access all Windows files and folders.
- **Live Media.** Presto is packaged as a live image that can be booted from removable media such as a USB flash drive or a CD. All other functionality is the same.
- **Factory Image.** Presto is packaged and delivered as an image for installation when the target computer is manufactured. All other functionality is the same.
