

## Revolutionizing the User Experience

Your customers want a portable device that makes it easy to work, have fun, and stay in touch—without the cost or drawbacks of traditional products. But if you're an OEM/ODM, how do you deliver this product on short development cycles while ensuring high customer satisfaction and low costs?

Raise the quality of the user experience that your product delivers, eliminate development time and costs, reduce product defects, and open new revenue streams by tapping into our deep skills in Linux engineering, Windows interoperability, user interface design and application usability. We've worked closely with Asustek Computer, Inc. to create the revolutionary new desktop interface that helped to launch the wildly successful Asus Eee PC and the netbook market. We can also help you develop successful new devices.

## The Xandros Advantage

Reduce your time to market by using our proven end-to-end solutions which provide:

- A branded, easy to use custom interface
- Control over all aspects of the application mix, fonts, and themes
- Multiple language packs
- A branded "Click N' Run" digital marketplace for delivering software and services, and building a user community

Ensure high product quality and attract increasingly demanding customers by drawing upon our long record of success in user interface design, Windows interoperability, and application usability.

## End-to-end Services and Solutions

### Value-added Product Differentiation

With new netbooks and other Mobile Internet Devices arriving nearly every day, innovative product differentiation is key to gaining a foothold in these fast-growing markets. Whether your device needs a comfortable, Windows-like environment or an arresting new interface, our engineers and usability experts can help you define and meet your unique requirements.

### User Friendly Products with Seamless Interoperability

We lead the way in transforming Linux into a user-friendly platform with an all-graphical user interface. We set high standards for consistency and Windows interoperability, including enhancements to ensure that printing, networking and file management are seamless and intuitive.

### Getting Your Product to Market ... Worldwide

Our relationships with leading vendors such as Microsoft and Intel help you eliminate technical obstacles. We also help you navigate the licensing processes for third-party technologies such as Adobe Acrobat and Flash, multimedia codecs, and fonts. Our complete localization services in more than 24 languages speed your delivery to international markets.

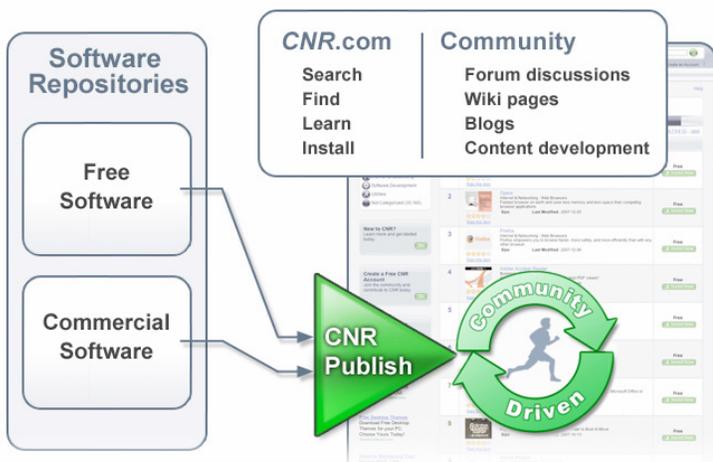

### Building Your User Community

We can help you build a user community to champion your product and enhance your platform with:

- A custom "Click N' Run" digital marketplace to engage your customers and attract ISVs.
- A comprehensive SDK to enable commercial software developers to provide branded enhancements.

## CNR – Your Digital Marketplace Advantage

With (CNR) solution you can quickly build a branded digital marketplace to attract a community of users and ISVs:

- One-click download and installation of software, media content, and services.
- Harness the power of the community with forums, wikis, and blogs.
- Let users rank products via star ratings and reviews.
- Automatically notify users of available updates.
- Manage repositories and automatically match packages to products.
- Enable ISVs to create custom marketplaces, with full control over pricing, licensing, and DRM.

Whether you want to simply direct users to your CNR site, provide a branded site for your specific device, or create a custom digital marketplace with complete control over interactions with users and vendors, we can tailor a solution to your needs.

## Custom Linux End-to-end Platform Solutions

We can customize your end-to-end solution for a range of platforms including MID, Netbook, Nettop, ARM and X86.

## About Xandros

Xandros is the leader in enabling Linux and Windows to work together. The company's enterprise products leverage an organization's existing skill sets by providing seamless Windows-Linux interoperability. Scalix delivers award-winning Linux-based email, calendaring and messaging. BridgeWays management packs simplify managing mixed Windows, Linux and UNIX environments from one console. Custom, integrated netbook and application store solutions allow OEMs to get to market quickly with an end-to-end user experience. The company is headquartered in New York, with R&D offices in Ottawa, Frankfurt and Mumbai, and sales and support offices worldwide.
